

Download Clamp shown with Banding Adapter

Wood Pole Clamp

### Features

- Slip strength: >100 lbs.
- Lattice adapters provided with break-away bolts for precise torque during installation
- Steel tower guide clamps available with adapters to eliminate the need for drilling
- Banding adapters available

## Download & Wood Pole Clamps

The AFL Download Clamps are used to guide Optical Ground Wire from the top of the structure to the splice box. Our clamps install easily and provide proper spacing and hold strength without damage to the cable. From poles to towers, we offer a full line of OPT-GW Download Clamps to meet the needs of any application.

### Ordering Information – Download Clamp & Adapter

(Note: for metric hardware, add suffix "M" to part number)
